

Free Standing Mezzanine

HEATING • AIR CONDITIONING • REFRIGERATION • VENTILATING • SHEET METAL

To whom it may concern:

Holbrook Service is always looking for more efficient ways of doing business. As our business grew, the volume of our accounting records and job files increased and began taking up valuable warehouse space. We needed more room for record storage without compromising square footage in our warehouse.

Lance Jorgenson reviewed with us different solutions that might work for our problem. He recommended that a free standing mezzanine level over the warehouse area could be used for file storage. Our confidential files could be moved up to the mezzanine where they could be secure and easily accessible. This gave us the opportunity to reclaim our valuable warehouse space.

The price for installing the mezzanine was one-third the cost of building the same amount of square footage using traditional building methods. Lance kept us informed when the materials would be delivered, minimizing interruptions to our workforce. I thought their installation crew was very fast and efficient in installing the mezzanine. In fact, we were planning on a two to three day installation, but the job was completed in one and they were pleasant to work with.

Jorgenson Companies was great to work with. Their salesman was knowledgeable and knew the best way to help us. Their crew was fast and professional. It was a pleasure to work with Jorgenson Companies and I look forward to working with them again.

I know they will do a great job for you also. If you have additional questions, please don't hesitate to give me a call.

Sincerely,

A handwritten signature in blue ink that reads "John W. Holbrook".
