To Whom it May Concern:

**RE: RECOMMENDATION OF JORGENSON COMPANIES**

The Chadwick Company was contracted by Tire Factory to build their new distribution facility. We had the pleasure of working with Jorgenson Companies on the racking portion of the project. Jorgenson's sales staff helped us work through the process of designing and laying out Tire Factory's racking system. They took the time to determine our needs and work as partners with us whereas other companies relied on their engineers to design a project that did not meet our needs or expectations.

Jorgenson Companies was flexible with us on the delivery of materials and worked with us to accommodate unexpected delays. When their installation crew came in and began working on the job, they worked fast and stayed on task. They were very accommodating and efficient and coordinated with me and the Tire Factory's staff so that all schedules were met. They were easy to work with when we need to make changes and finished the project much faster than we anticipated.

I am convinced that if our building contractor's crew would have worked as effectively as Jorgenson Companies' crew, our building would have been finished on time instead of six months later.

We appreciate the great job that Jorgenson Companies did on this project.

Sincerely,

ED Chadwick  
President
