

Supplied & Installed 7000 sq ft of Mezzanines, Handrails, Ramps and Safety Gates in 10 working days

Date May/28/2010

To whom it may concern,

We used Jorgenson Company for a pallet rack/mezzanine project in 2009. From start to finish they delivered what was asked. The bid was thorough and accurate and was performed in a timely manner. This project was up against a very critical timeline and I was concerned about using a new vendor for this type of project especially with a short timeline. During the bid process David Arbon assured me that the project would be done according to specifications and would be completed on time. I was still concerned about the deadline as it involved acquiring specially designed racking from the manufacture. David worked daily with the manufacture to insure that the correct items were delivered on time. Any complications that came up were handled and taken care of and the project was completed on time as promised. I would recommend them for your pallet rack needs.
