Dear Mr. Jorgenson;

Thank you for accommodating once again our racking needs for 2008. I want you to know the reason why we called you again is because of the professional job your company did in installing our racks back in 06. From the bidding process to the final inspection, your company was courteous and friendly and we appreciated the professionalism.

I look forward to working with you once again this year and as our growth continues who knows, maybe we will be racking another entire warehouse soon.

All the best;

Scott Simpson
