Rack Protection

Protect Your Racking

End-of-Aisle

Rack Protection

Cogan end-of-aisle rack protectors are the smart choice when you need solid protection close to the ground.

Effective protection close to the ground, Cogan end-of-aisle rack protectors shield sensitive rack-aisle-ends from warehouse traffic. Prevent collision damage should a fork truck or other in-plant vehicle steer off-course and accidentally bump the racking. When properly anchored to the floor, Cogan end-of-aisle rack protectors help guard your investment without interrupting aisle flow patterns or limiting access to your pick area. Available in single and double-sided configurations.

Rack Post

Rack Protection

Easy-to-install and economical, Cogan rack post protectors provide just the right amount of protection around individual racking posts.

Pallet rack systems are not designed to withstand forklift impact. Even the slightest traffic collision can result in structural damage and potential rack collapse. Cogan rack post protectors are designed to shield vulnerable column uprights from such accidents. The durable, all-steel construction wraps around the entire circumfrence of each rack post to absorb and dissipate impact. Your racking will remain intact and your workflow productive. Cogan rack post protectors are available in three standard sizes to accomodate a range of racking systems.

Rigid and resilient, form a sturdy wall of protection between your employees and your inventory with Cogan wire mesh rack guards.

Rigid and resilient, Cogan rack guard panels bolt directly onto racking uprights, effectively placing a barrier between stored materials and the picking aisles below. Your workers remain safe from falling debris should a forklift bump the racking or if a pallet breaks. The wire mesh construction forms a sturdy wall of protection for your employees, while your inventory remains secure and visible. Simple nut-and-bolt assembly makes installation quick and easy, minimizing costs and maximizing savings. It's why Cogan rack guards consistently outperform in every crucial area— including price.

Rack Guards

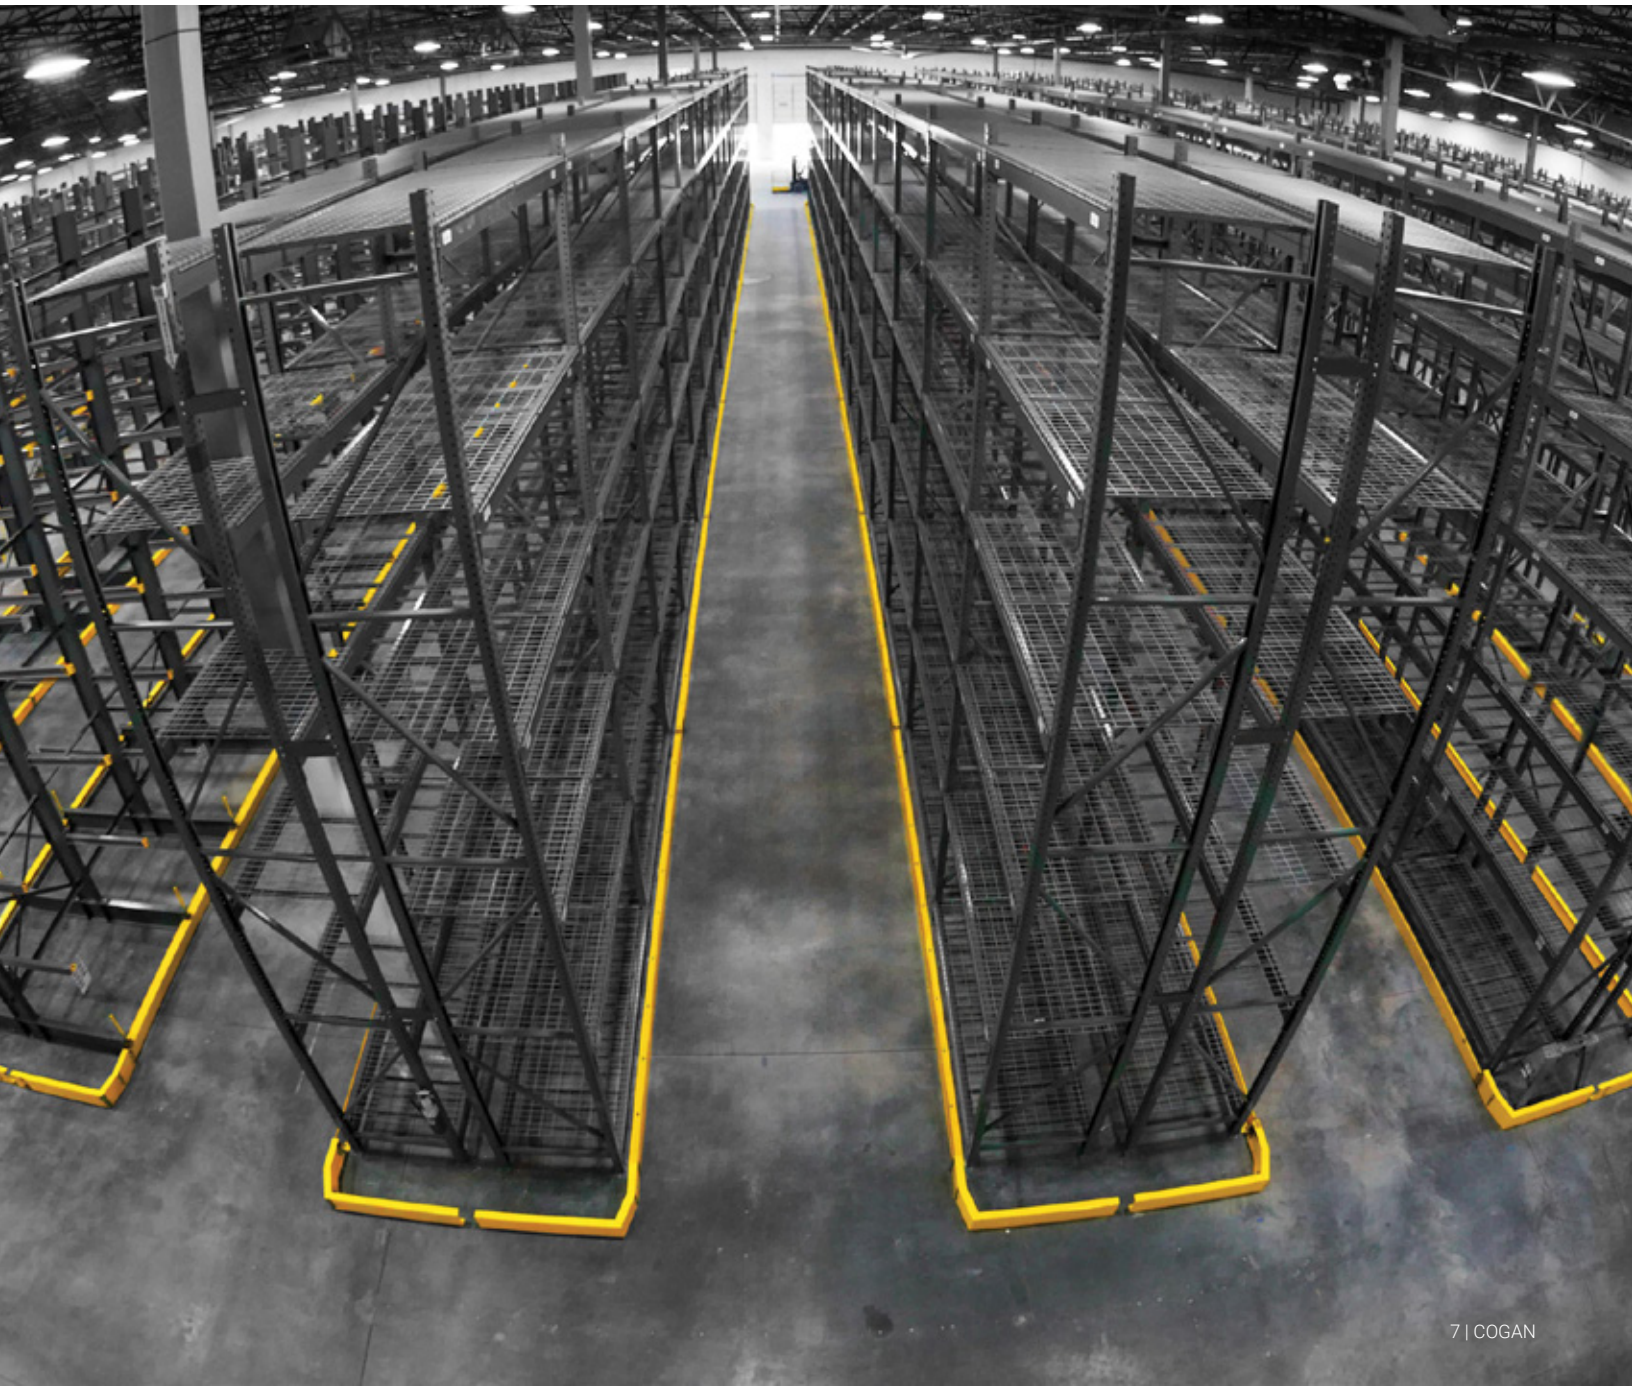

Back-of-Rack Protection

Floor Guide

Rack Protection

Effective and reliable protection. Direct in-plant vehicles along safe channels and aisle ways with Cogan floor angle guide.

Cogan floor angle guide provides continuous, uninterrupted protection low to the ground. Easy-to-install and economical, our floor angle guide keeps traffic away from critical rack supports, pallet flow rails, walls, offices, and other work areas. Floor angle guide can also be used for narrow aisle storage applications The durable, all-steel construction stands up to forklift accidents and other collisions. You benefit from a safer work environment that protects your people, products and profits.

Standard Colors

Standard colors are applied to all products and are inluded in the material price on your quote. Unless otherwise specified, all standard colors are powder-coated for a durable, long-lasting, and maintenance-free paint finish.
